

The Future of Concrete

Micro-Crete

Single Component Micro-Topping

RESTORE - RENEW OLD CONCRETE

PRODUCT OVERVIEW

Increte Systems' *Micro-Crete* is a single component designed for interior and exterior applications for smooth or broomed finish.

Micro-Crete allows you to transform dull, spalled, but sound concrete surfaces into a surface of possibilities providing an easy and inexpensive alternative to the removal of existing structurally sound concrete. And, because *Micro-Crete* cures at 4,000psi, it offers durability as well as economy.

Unlike other similar products, this single component product only needs to be mixed with water (making it eco-friendly as well as convenient), is fast drying, and the cementitious polymer resin formula provides a workable mixture that avoids tearing during application.

FEATURES/BENEFITS

- Single component compound - *just add water.*
- May be applied up to 1/8"
- Multiple layers may be applied for build up.
- Broom or smooth trowel.
- Interior and exterior applications.
- Cures to 4,000psi.
- Fast setting formula - foot traffic in 24 hours.
- Ideal for staining and dying.

Micro-Crete can be trowelled smooth or broomed for a greater non-skid surface

PRIMARY APPLICATIONS

Micro-Crete is the ideal material to restore existing structurally sound commercial or residential concrete surfaces and perfect for:

- Restaurants ● Retail Stores
- Shopping Malls ● Hotel & Office Lobbies
- Commercial Entryways ● Driveways
- Sidewalks ● Patios ● Pool Decks

Micro-Crete is outstanding to create a new surface for adding color to any decor
